DETAILED ACTION

This Office Action is in response to a communication made on August 26, 2005.

Claims 1-54 are pending in this application.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-43 and 45-54, drawn to a managed object application, classified in class 719, subclass 316.
- II. Claim 44, drawn to data modifying in a data messaging system, classified in class 709, subclass 246

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because if all the system platforms are running homogenous system there is no need for any type of data translation. The subcombination has separate utility such as any distributed application system that has two independent application that need to communicate through a translation module.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
